The 58 statewide Assistive Technology (AT) Programs form a national network of statewide assistive technology programs. Information contained in this brochure represents the accumulation of knowledge of this national network. This publication was made possible by Grant Number 90AG0050-01-00 from the Administration for Community Living. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Administration for Community Living.

Selected Online Assistive Technology Vendors

Individuals with disabilities throughout New Jersey use a wide variety of assistive technology (AT) in their homes, schools, workplaces, and in the community. A number of different vendors provide an array of different devices to help people with different types of disabilities work, learn, read, and participate in many different sorts of activities. Many of these vendors provide websites with detailed information about various assistive technology devices.

This bulletin lists several online vendors who provide AT devices, as well as a telephone number to contact each vendor to request catalogues or product information. This list does not include every possible vendor. Disability Rights New Jersey (DRNJ) does not endorse any specific vendor. DRNJ encourages individuals to shop around to find the best device for them at the most reasonable price. Additionally, DRNJ encourages individuals to utilize the National Public Website on Assistive Technology, at http://assistivetech.net/, which provides a more comprehensive listing of vendors.
